Rail-less helmets are a common commodity in every Defense / LE / Security related warehouse. Hundreds of Thousands of PSGT / MICH / FAST helmets are being used or sitting in Emergency storages worldwide . Almost all of these helmets were produced without rails nor front shrouds for IR devices.

Adopted by the Israeli Defense Forces and other world-wide militaries & LE organizations, this mount transforms old ballistic helmets into a cutting edge / battle-ready ballistic platform at minimum costs in minimum time.

In the last few years, the helmet "real-estate" has become more and more important for combat troops. IR devices, mostly used by special forces in the past, are today a standart issue equipment for almost any soldier. Same as with flashlights, Cameras, Power-Packs and helmet identification markers. Installing these devices on an old style (rail-less) helmet is not possible unless drilling the helmet shaell and weakening it in the process.

NO MORE!

The H-Mount platform is a patented rail system designed to solve this exact problem. It enables a quick & easy upgrade of an old-style helmet into an up-to-date Picatinny platform, adding shroud and rails while the helmet remains bolt-less and intact!

H Mount

HM2 Series

The HMA 2 system allows simultaneously mounting of numerous accessories on front, back and optionally sides of military / law enforcement helmets.

Installation requires no holes in helmet / no glue
Unique patent pending design

One size (see "helmet size")

Multiple mounting options

Easy to install and remove

Location of accessories closer to central gravity axis

Lightweight & flexible but also solid & durable.

Main Unit (HM2)

Designed to provide mounting options from the front of the helmet to its back with the features of NVG shroud, cameras and rails.

It can be used as a standalone and is an excellent choice for NVG kits.

Features:

1. Clamps providing No-holes- in-helmet installation.
2. NVG shroud.
3. Four standard rails- two in the front, two in the back.
4. Two built-in Camera connectors.
5. Back Picatinny rail.

Optional add-ons

A-2P

A permanent or quick-release add-on of two picatinny rails which allow additional flashlights and markers to be attached to the helmet.

A great cost-effective and lightweight alternative to side rails.

(HM2)

H Mount

Designed to provide mounting options from the front of the helmet to its back with the features of NVG shroud, cameras and rails.

It can be used as a standalone and is an excellent choice for NVG kits.

Features:

1. Clamps providing No-holes- in-helmet installation.
2. NVG shroud.
3. Four standard rails- two in the front, two in the back.
4. Two built-in Camera connectors.
5. Back Picatinny rail.

HMA 2 – Installation

Compatible Accessories (examples)

Accessory Accessory

HMA 2 – Main Unit			Accessory
Shroud 	NVG Helmet Mount 	NVG Helmet Mount 	NVG Helmet Mount 
Mount Rails 	M5 retention rings 	Map reader 	
Camera mounts 	Generic connectors 	Camera GoPro 	Camera GoPro 
Back Picatinny rail 	Picatinny mounting rings 	Tactical marker TL5-pro 	Battery Pack & Counterweight

HMA 2 Add - on	Accessories	Accessories	Accessories
A-2P 	Tactical marker 	mounting rings For flashlights 	Flashlights with Picatinny mount 

Specs

Helmet Type

The HMA system was designed for ACH type helmets but can also work with many other shapes without brim.

Helmet Size

The HMA 2 system comes with an installation mechanism (patent pending) which covers most of the helmet size ranges from Medium/Large to Extra- large.

*Can also be customized to any other dimensions.
